VIKING INDUSTRIER

FIBERGLASS OFURO TUB

www.vikingindustrier.com

PRODUCT DESCRIPTION

This OFURO oval-shaped fiberglass Tube is perfect for two people. More intimacy and private relaxation can be offered in larger round Tubs. Due to its size, this Hot Tub is much easier to transport, and beautiful handmade trim will naturally provide elegance and luxury for Ofuro Hot Tub.

SPA equipment in the hot tub

Air bubble system
It is a small air blower that will relax and soothe your muscles, as well as keep the water rotating and moving around your body. You can also control the airflow to regulate how intensive you want the bubbly Tub to be. This massage system is installed in the benches, seats of a Hot Tub.
The air massage system consists of *12 air-blowing nozzles; Air pump 700 W; a Control button; Connecting hoses.*

Hydromassage system
Hydro-massage (intense water-massage) works by pumping water out of the Hot Tub and pushing it under high pressure back into the tub through the jets (it can pump up to 1.5 m3 of water per minute). Hydromassage - 6 jets in walls. The water pumps 1500 W is distributed in walls and these jets create a powerful stream of moving water, providing a deep massage for your body. Our innovative jets are designed to target specific muscle groups. Enhancing your enjoyment to a higher and more massage level.

The Air bubble and Hydromassage system. 14 jets: 6 air jets and 8 hydro massage jets in walls.

LED lights
A fun way to set the mood and enjoy your relaxing background is to add the underwater LED lights to your Hot Tub! Use them to help your guests guide their way in the Hot Tub, or just for a colorful addition. Our LED lights are specifically made for our hot tubs to allow you to get the maximum effect of illumination.

SPECIFICATION

Timber	Spruce
Shape	Oval
Total height	1030 mm
Exterior Cladding	11 mm
External dimension	1895 x 1280 mm

STANDARD SET

Wooden hot tub with a fiberglass frame inside;

Fiberglass inside benches;

Outlet valve;

Stairs (3 steps).

DELIVERY

Size of pallets (LxWxH)	1.90 x 1.20 x 1.16 m
Weight	200 kg

We deliver only **fully assembled** fiberglass hot tubs with spa, so no much additional work needs to be done.

OPTIONS

COLOR

- Grey (RAL7015);
- Cream (RAL9001).

Fiberglass color

HEATER FOR OFURO HOT TUB

- External heater, round, 304 stainless steel *(optional)*;
- External heater, round, 316 stainless steel *(optional);*
- External 8 - corners heater, 304 stainless steel *(optional);*
- External 8 - corners heater, 316 stainless steel *(optional).*

What means the different stainless steels in the heater's options?

Our standard heaters are made from 304 stainless steel.
If chlorine, bromide, saltwater or other chemicals are to be used, the heater steel grade must be upgraded to a 316-grade stainless steel heater!

External round heater

External 8 - corners

ELECTRIC HEATER AND SAND FILTER

- Electric heater Pahlen 3kW: connection CEE16/230V + sand filter *(optional)*;
- Electric heater Pahlen 6kW: connection CEE16/400V + sand filter *(optional)*;
- Sand filter 4 m3/h (without heater) *(optional)*.

ELECTRIC HEATER KIT:

ATTENTION! We recommend using an electric heater only to keep water warm for a longer period of time, to get the best result to choose heating together with a wood-burning heater!

ELECTRIC HEATER made of fiberglass reinforced thermoplastic - Tough and corrosion-resistant.

SAND FILTER SATURN (7 m3/h) tank is made of polyethylene. The simple construction and perfect technology production ensure work for many years. Recommended replacement of the sand every **1-2 years**.

Important! The water must not be aggressive. The heater and sand filter must not be used in salt water or in pools where an electro chlorinator is used.

FOUNDATION

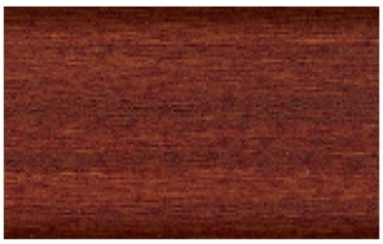

A stable, even and sustainable space is needed to set up a Hot Tub on it. Gravel, loose chippings, quarry tiles (flagstones) are recommended. A ground with hummus or patches of grass is not suitable. Drainage could be of advantage depending on the local conditions. A concrete foundation is not necessary. It is important that air can circulate underneath the Hot Tub so that damp can vaporize.

COLOR CARD

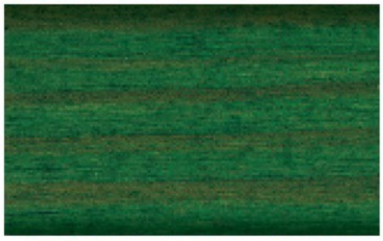

EXTERIOR WOOD STAIN COLORS

Water-based, quick drying premium total protection for wood outside.

PAINTING

AUTOMATIC MACHINE SPRAY TECHNOLOGY
Benefits

One of the main and most obvious benefits of using a paint machine is the speed and flexibility at which we can suggest our painting service for all of our products. A spray paint machine can get the work done faster and more consistently than manually painting. While the machine works faster, it improves quality too – sprayers produce an even coat of paint, leaving a high-quality finish.
With our painting service from now, we can suggest our client's maximum flexibility! Not assembled products such as Grill cabins, Pavilions, Camping pods, and other products of any size you can order painted too!

PROFESSIONAL SPRAY

The high-quality preservative finish is professionally spray applied in the factory to three sides of the wood. The product is treated in your choice of color (one color for all product).

STAIN | PAINT
Which type of paint should I Use?

Properly painting and impregnating is one of the most important things to consider when thinking about how to extend your product's lifetime.
Paint and natural wood finish instantly spruce up the aesthetics of your product.
The decision you will need to make is if you want to use a water-based wood stain or paint. Both will offer you UV protection. The wood stains will allow the texture of the
wood to show through and many are now available in a vast range of colors, however, paints will give you an intensive color, but will cover the grain and texture of the wood.

USAGE AND MAINTENANCE

ATTENTION! Read and follow all instructions carefully before installing and using this product!

- At first, water will leak, within 3-5 days the tub will swell and become completely tight.
- Fire and hot water may lead to serious injuries! ***Never leave your children and those with disabilities unattended!***
- Cleaning and maintenance shall not be made by children without any supervision.
- Our Hot tub can't be used by children aged 8 years and persons with reduced physical, sensory or mental capabilities.
- ***Keep this product more than 2 m away from the pool*** (for France 3.5 m), to prevent children from climbing on it and accessing the pool.
- Never heat the Hot Tub when it is empty! The Hot Tub could get on fire and unrepairable damages may occur!
- Standard our heaters are made from 304-grade stainless steel. ***If chlorine, bromide, saltwater, or other chemicals will be used heater steel grade must be upgraded to 316-grade stainless steel.***
- ***It is very important to empty the heater from the water as well in case there are minus degrees outside.***
- All information is based on experiences made and is the best of our beliefs. The local circumstances and other conditions must be taken into consideration from each individual Hot Tub user.
